

PLASTIC TOTAL TEAR OFF CAP

the latest innovation in the RayDyLyo range

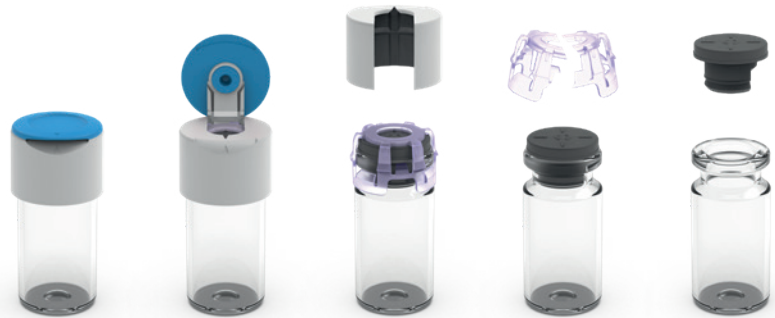

RayDyLyo[®] TearCap is a bi-material part that can be completely and easily removed from the vial. This allows easy access to the stopper and vial contents.

- **An alternative** to conventional aluminum Tear Off seals
- **Ergonomic** with reduced opening efforts
- **No risk** of jagged metal edges **damaging gloves**
- **Suitable for mixing** and reconstituting product

THE LATEST INNOVATION IN THE RAYDYLYO RANGE

A **plastic Total Tear Off Cap**
for 6 to 100 R vials suitable
for all applications
that require the **complete
removal of the cap**
to access the contents.
